

# C Programming

Setting up a Visual Studio  
2013 Project

You were initially told to set up  
an Empty Project

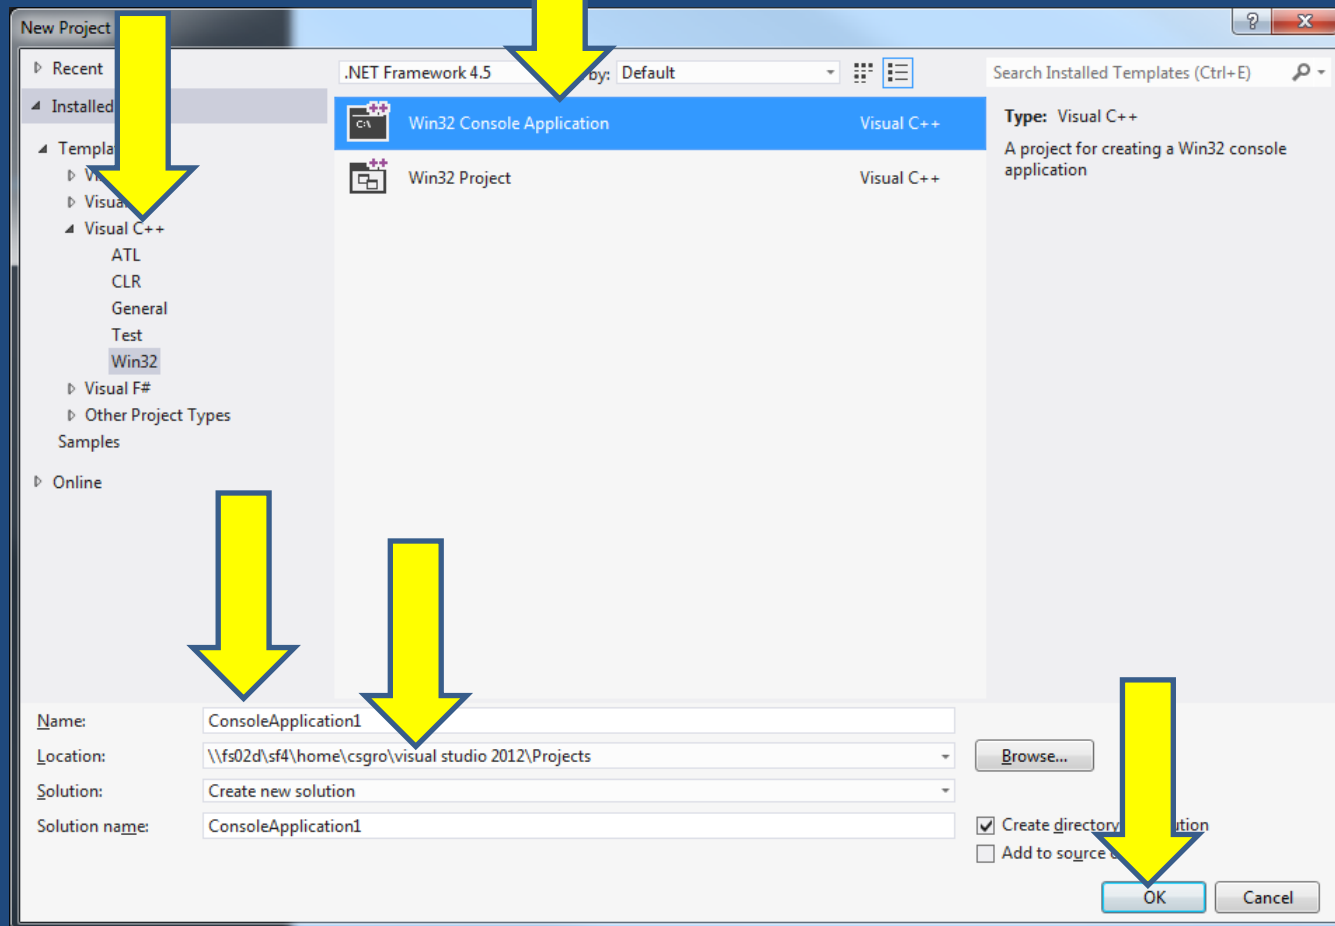

That had a nasty  
side-effect of  
your output  
disappearing  
for the  
exercises (and  
assignment #1)

There's two  
acceptable  
workarounds for this

# Workaround #1

Instead of starting with an  
Empty Project,  
start with a Win32 Console  
Application

On the  
Application Settings page,  
check the  
Empty Project  
checkbox

Win32 Application Wizard - ConsoleApplication1

## Application Settings

Overview

Application Settings

Application type:

- ☐ Win32 application
- ☒ Console application
- ☐ DLL
- ☐ Static library

Additional options:

- ☒ Empty project
- ☐ Export symbols
- ☒ Precompiled header
- ☒ Security Development Lifecycle (SDL) checks

Add common header files for:

- ☐ ATL
- ☐ MFC

< Previous

Next >

Finish

Cancel

# Workaround #2

Keep creating an  
Empty Project  
but ...

Change a specific  
Project Property

ConsoleApplication1 - Microsoft Visual Studio

FILE EDIT VIEW PROJECT BUILD DEBUG TEAM TOOLS TEST ANALYZE WINDOW HELP

Quick Launch

Sign in

Source.c

(Global Scope)

- #include
- #include
- int main()
  - {
  - print
  - int a
  - bool
  - for(i
  - {
  - printf("%d\n", b);
  - }
  - return 0;
  - }

main(void)

100 %

Output

Show output from: Debug

'ConsoleApplication1.exe' (Win32): Loaded 'E:\a\Visual Studio 2013\Projects\ConsoleApplication1\Debug\ConsoleApplication1.exe'. Symbols loaded.

'ConsoleApplication1.exe' (Win32): Loaded 'C:\Windows\SysWOW64\ntdll.dll'. Cannot find or open the PDB file.

'ConsoleApplication1.exe' (Win32): Loaded 'C:\Windows\SysWOW64\kernel32.dll'. Cannot find or open the PDB file.

'ConsoleApplication1.exe' (Win32): Loaded 'C:\Windows\SysWOW64\KernelBase.dll'. Cannot find or open the PDB file.

'ConsoleApplication1.exe' (Win32): Loaded 'C:\Windows\SysWOW64\msvcrt120d.dll'. Cannot find or open the PDB file.

The program '[0x1868] ConsoleApplication1.exe' has exited with code 0 (0x0).
