*Operating System Fundamentals*
*Module 11 Assignment – Simple Web Site*

Individual Submission

Requirements:
You will develop a simple web site to demonstrate your knowledge of web site basics. These are the specific requirements:
1.  The site must be a minimum of 3 pages.
2.  You should be able to navigate around the three pages easily using hyperlinks or other suitable navigation method.
3.  Each of the pages must have a similar layout with the following features:
    a.  Identical heading layout on all pages, with the unique page title on each
    b.  Identical navigation controls on all pages
    c.  Identical footer on each page containing (at least) a copyright notice. The footer should be a smaller font than the rest of the page.
    d.  Consistent content area, where specific content is provided
    e.  Consistent theme (colours, fonts, backgrounds, etc.) across all pages
4.  You must have at least one image in the content area on each page.
5.  You must have an image (like a logo) in the heading of each page.
6.  The pages must appear pleasing to the eye.
7.  The web site must be complete, and should be easily portable to any server or directory.
8.  Only basic HTML is required – no client-side scripting or server-side programming.
9.  There should be no inline styles. Internal or external style sheets should be used.

You may choose your content from the following list of topics:
    a.  A hobby
    b.  About yourself (could be real or fictitious)
    c.  About your career of choice

Hand in:
-   All content in a single zipped folder, preserving the directory structure (if you have one)
